

Introducing SBAS Software

# Recommender System

## The new SBAS Software Accessory

ICD	Ranking	Parameter	Description
		Factor	Evidence
D50	14.53	2.47	Iron deficiency anemia
D47	6.9	-1.31	Other neoplasms of uncertain or unknown behavior of lymphoid, hematopoietic and related tissue
D75	5.12	-0.87	Other diseases of blood and blood-forming organs
D59	3.51	-0.56	Purpura and other hemorrhagic conditions
D54	2.76	-0.46	Other anemias
D52	2.35	-0.55	Myeloid leukemias
D58	1.76	0.72	Other coagulation defects
D72	1.88	0.12	Other disorders of white blood cells
D46	1.63	-1.58	Myeloplastic syndromes
D51	1.11	-0.36	Vitamin B12 deficiency anemias

The Recommender System is a patient-tailored system that provides a list of informative unmeasured blood parameters that are of great significance for the specific disease.

■ D68 - Other coagulation defects

Informative non-measured blood parameters
Prothrombin activity %; PT %
Activated Partial Thromboplastin Time; APTT
Prothrombin International Normalized Ratio; INR
Bicarbonate, Total
Sedimentation Rate; SR; Erythrocyte sedimentation rate; ESR
Col/Epi closure time
LDL Cholesterol
Creatine Kinase; CK; Phosphocreatine kinase; Creatine phosphokinase; CPK
SPE beta 1
Kappa free

This patient-tailored system curates a comprehensive list of crucial yet unmeasured blood parameters, offering valuable insights specifically relevant to the targeted disease. By focusing on these informative markers, it enhances the understanding of the disease's nuances and aids in personalized health.

## Benefits

### Personalized Insights

- Tailors recommendations to individuals.
- Aids early disease detection.
- Deepens understanding of patient's disease.

### Precision Health Management

- Provides specific disease insights.
- Allows precise and effective interventions.
- Supports patient-tailored treatment.

### Reduced Healthcare Costs

- Enables early intervention.
- Personalizes management and prevents disease escalation.
- Reduces the need for costly treatments.

## How it works

**Step 1:** Run SBAS Software

**Step 2:** Click a particular diseases for additional insights

**Step 3:** Review additional blood parameters recommendation
